WORDPRESS / CMS
PROJECT MANAGEMENT
PROBLEM SOLVING

WASIQ ZAHOOR

Full Stack Web | Desktop | Mobile App Developer

PROFESSIONAL SUMMARY

Passionate Software Engineer and Founder of NewTechSofts with experience across the full development lifecycle. Proven track record of designing scalable MERN/Next.js systems, cross-platform mobile apps (Flutter & React Native), and implementing AI/ML workflows (TensorFlow, OpenCV). Skilled in writing clean, maintainable code to deliver efficient, user-friendly solutions to real-world business problems.

WORK EXPERIENCES

Founder & Lead Developer | NewTechSofts January 2026 - Present

- Directing software architecture, leading developers, and delivering custom SaaS solutions and AI-powered enterprise systems.
- Engineering scalable cloud infrastructure and integrating AI-driven workflows into client projects.

Full Stack Engineer & Desktop Application Expert | Primze Tech February 2026 - Present

- Specializing in building scalable, modern, and high-performance web applications using the MERN stack and Next.js.
- Design responsive front-end user interfaces and engineer robust backend APIs and database schemas.
- Optimize application performance, resolve technical bugs, and manage secure PostgreSQL/MongoDB architectures.

Mobile Application Developer | Hecta Solution February 2026 - May 2026

- Design and implement robust, high-performance native and cross-platform mobile applications using Flutter and React Native.
- Build seamless UI/UX user experiences and integrate secure third-party APIs and cloud services.
- Manage end-to-end deployment pipelines on Apple App Store and Google Play Store.

Full Stack Web Developer | Fiverr (Freelance) February 2026 - Present

- Developed custom CMS websites, highly responsive landing pages, and functional e-commerce portals.
- Managed speed optimization, search engine friendly architectures, and custom WooCommerce setups for clients.

Full Stack Web Developer Intern | Eziline Software House Pvt Ltd June 2025 - October 2025

- Developed responsive front-end pages in React and built backend server routes using Node.js and Express.
- Collaborated on database management, API integration, and debugging application errors during the internship.
